1. Introduction

The Voting WordPress Plugin is a powerful tool designed exclusively for logged-in users of your WordPress website. This plugin enables registered users to participate in voting and express their preferences on your blog articles you wish to engage your audience with.

This guide will walk you through the installation process of the Article Feedback - Voting WordPress Plugin, with a focus on its use by logged-in users.

2. System Requirements

Before you begin, make sure your WordPress website meets the following requirements:

- **WordPress:** You need to have a self-hosted WordPress website (not WordPress.com).
- **Admin Access:** You must have administrator access to your WordPress website.

3. Installation Steps

3.1. Install via WordPress Admin

- 8 Log in to your WordPress admin panel.
- 9 In the left sidebar, go to "Plugins" and click "Add New."
- 10 In the top left corner, go to "Upload Plugin"
- 11 Once you see the plugin in the search results, click the "Install Now" button.
- 12 After installation, click "Activate" to enable the plugin.

3.2. Install via FTP

1. Download the Article Feedback - Voting WordPress Plugin from the official website.
2. Unzip the downloaded file to your computer.
3. Connect to your website using an FTP client.
4. Upload the unzipped plugin folder to the **/wp-content/plugins/** directory.
5. Once the upload is complete, go to your WordPress admin panel.
6. In the "Plugins" section, you will see the "Article Feedback - Voting WordPress Plugin." Click "Activate."

4. Activating the Plugin

After installation, you need to activate the plugin:

1. In your WordPress admin panel, go to "Plugins."
2. You'll find the "Article Feedback - Voting WordPress Plugin" in the list of plugins.
3. Click "Activate" below the plugin name.

5. Configuring the Voting Plugin

After activating the plugin, it will automatically appear on the front-end below every post, and in the back-end as a widget for the post editor.

6. Using the Plugin for Logged-In Users

This voting system is exclusively designed for logged-in users. Once the plugin is activated and configured, registered users can start using it:

1. Create or edit a post where you want to add a voting element.
2. In the post editor, you should see a widget displaying the voting results of the current post.
3. When you are creating a new post, at first you should see „0“ as a result.

4. If the plugin is active, it inserts the voting element at the bottom of every posts into the front-end automatically.
5. Publish or update the post to allow logged-in users to participate in the voting system.

7. Troubleshooting

If you encounter any issues or errors during the installation or use of the Article Feedback - Voting WordPress Plugin, please contact the plugin's support team for assistance: info@inmira.hu
